Breath of Love captures the very essence of love. This piece awakens the senses and envelops the soul in a gentle warmth.

The first notes resonate like whispers of affection, delicately caressing the hearts and igniting the desire to be carried away in a sensual dance.

Time suspends its flight, making room for a moment of eternity where passion and tenderness mingle.

The intertwining voices echo like distant echoes of a forgotten past, yet still present in the hearts of those who listen. They carry with them a wave of memories, of shared moments.

Through its enchanting notes, it reminds us that love is the greatest force there is, capable of transcending time and space, and carrying us towards infinite heights of happiness.

BIOGRAPHY

Laurent La Rocca is a **musical explorer**.

A composer and musician since his youth, he served as the bassist of the Marseille reggae group **Daïpivo** for 30 years, and for a little over a year now, he has embarked on a solo journey.

Drawing inspiration from the realms of reggae, dub, jazz, soul, and electronica, the winds of **his creativity** lead him to new galaxies.

His music illustrates his adventure : metallic sounds reminiscent of the vastness and mystery of infinite spaces.

CREATIVE PROCESS

The artist, seeking to capture the present moment, dives directly into the recording, seizing the raw energy of the moment. Each note, each beat is a spontaneous revelation, captured without artifice, directly from the heart of inspiration.

He savors this creative freedom, exploring musical territories without constraint, allowing his inspiration to wander with the emotions.

The deep bass reverberates like the pulsations of a loving heart, while each note seems to throb with a gripping intensity, transporting the listener into a state of pure ecstasy.
